

**You've got the file.
Now it needs an address.
GitLab will give you one,
free, permanently,
in about five minutes.**

No credit card. No server. No command line.

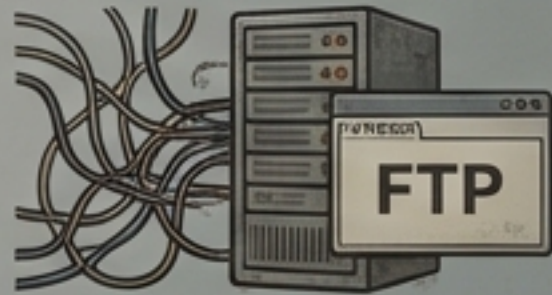

The Hosting Blueprint

Traditional Web Hosting

Cost: Monthly fees & credit cards.

Setup: Server configuration & FTP clients.

Maintenance: Security patches & downtime.

The GitLab Method

Cost: 100% Free forever.

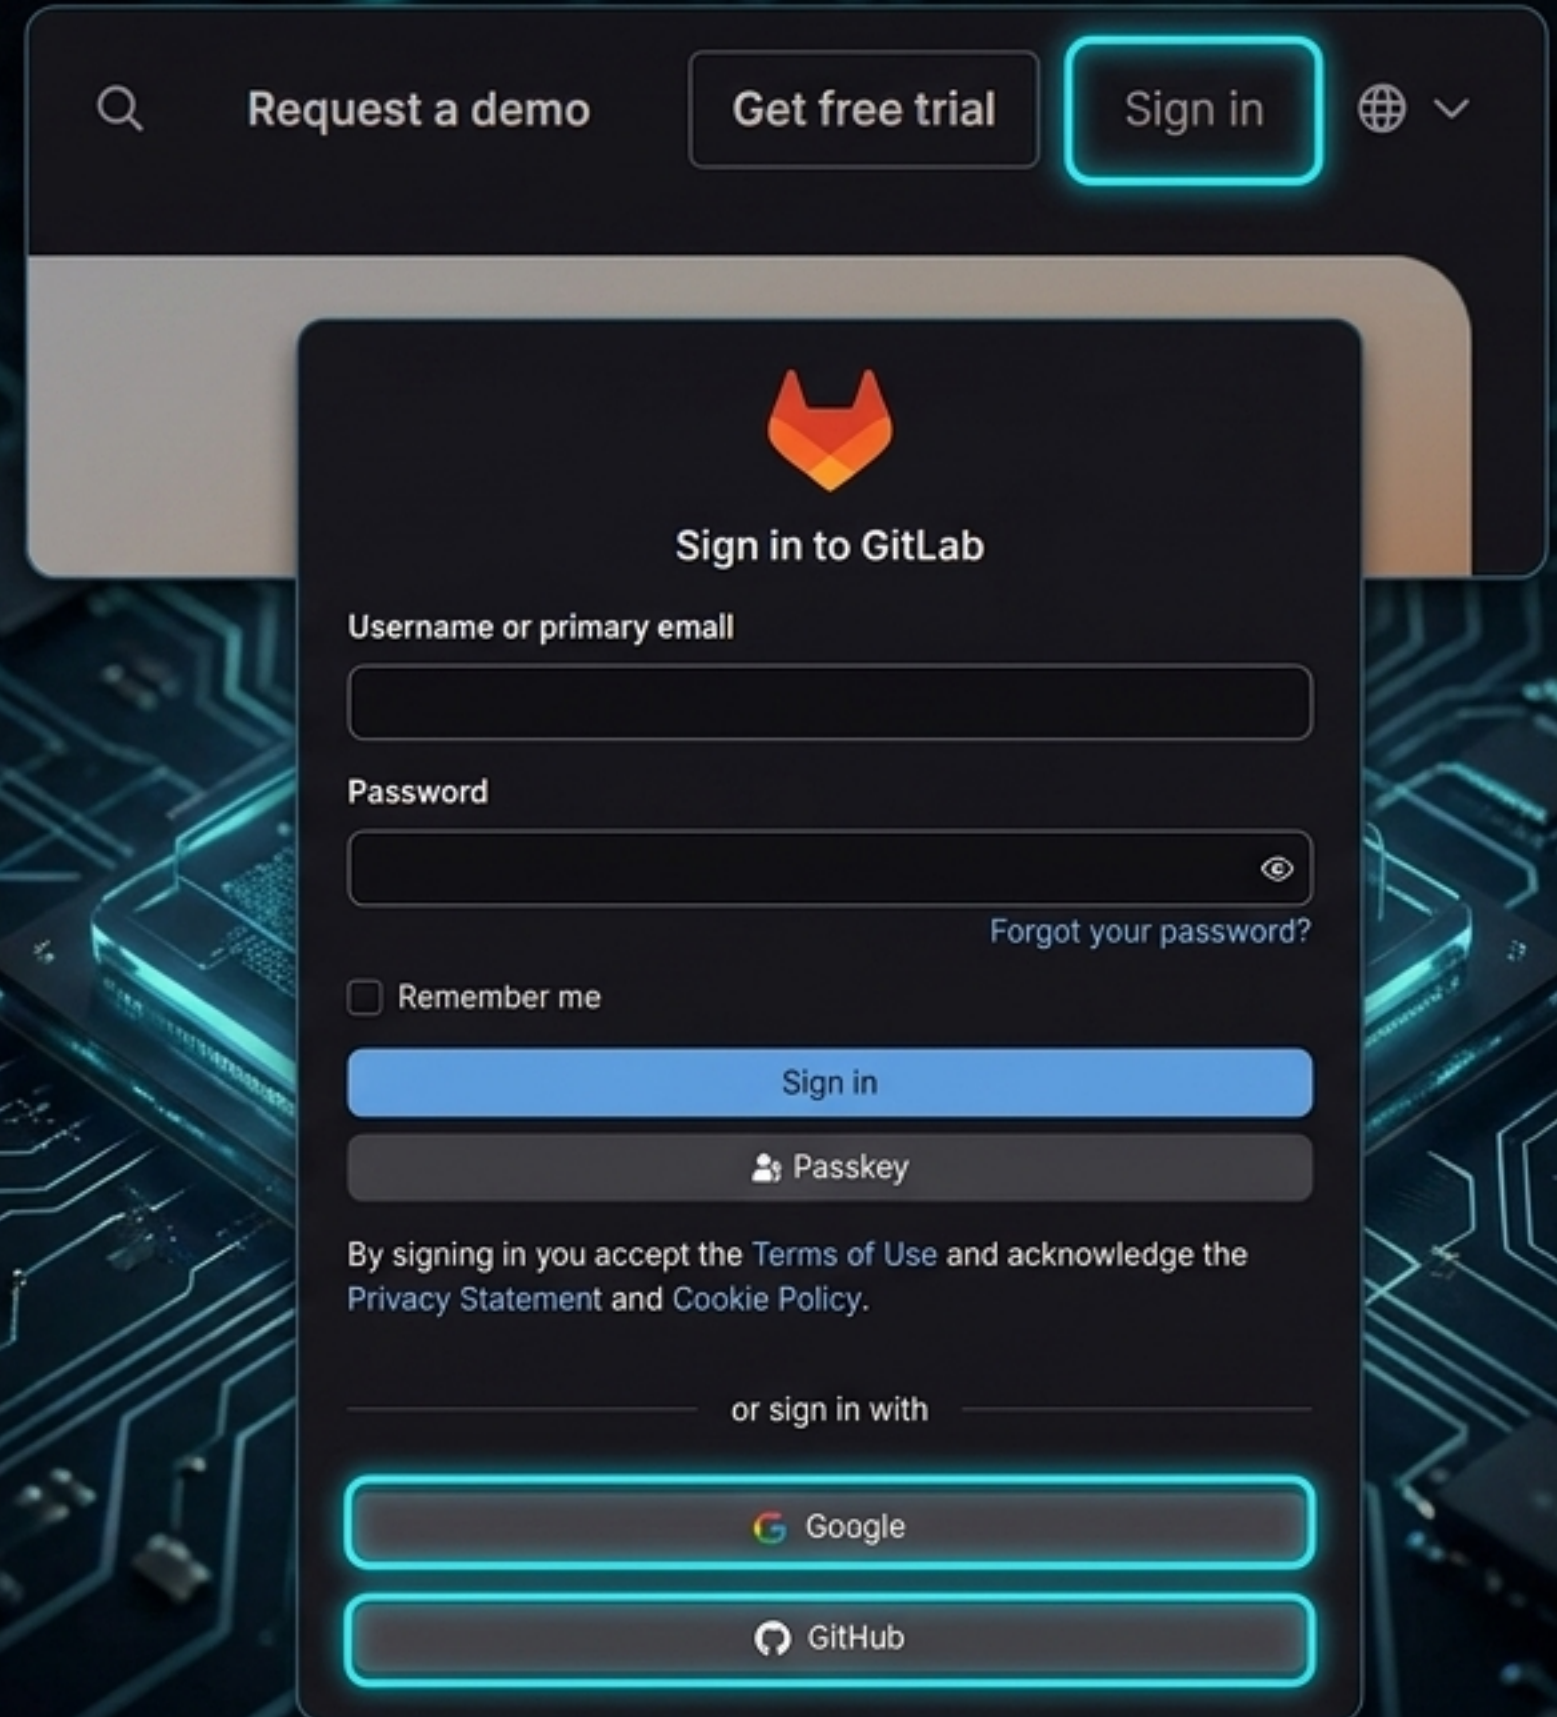

Setup: Visual drag-and-drop.

Maintenance: Zero. Handled by global infrastructure.

Create a free account at gitlab.com. Email or SSO — your call. Verify your address when they ask.

The image shows a screenshot of the GitLab sign-in page. At the top, there is a navigation bar with a search icon, a 'Request a demo' button, a 'Get free trial' button, and a 'Sign in' button which is highlighted with a red border. Below the navigation bar is the GitLab logo and the text 'Sign in to GitLab'. The main form contains fields for 'Username or primary email' and 'Password'. There is a 'Remember me' checkbox and a 'Forgot your password?' link. Below the form are two buttons: 'Sign in' and 'Passkey'. At the bottom, there is a line of text stating 'By signing in you accept the Terms of Use and acknowledge the Privacy Statement and Cookie Policy.' followed by 'or sign in with' and two buttons for 'Google' and 'GitHub'.

New project → Create blank project.
Set visibility to Public — your file needs to be readable without a login. Give it any name you like.

Create blank project

Create a blank project to store your files, plan your work, and collaborate on code, among other things.

Project name

bernard-hermit

Must start with a lowercase or uppercase letter, digit, en

Visibility Level ?

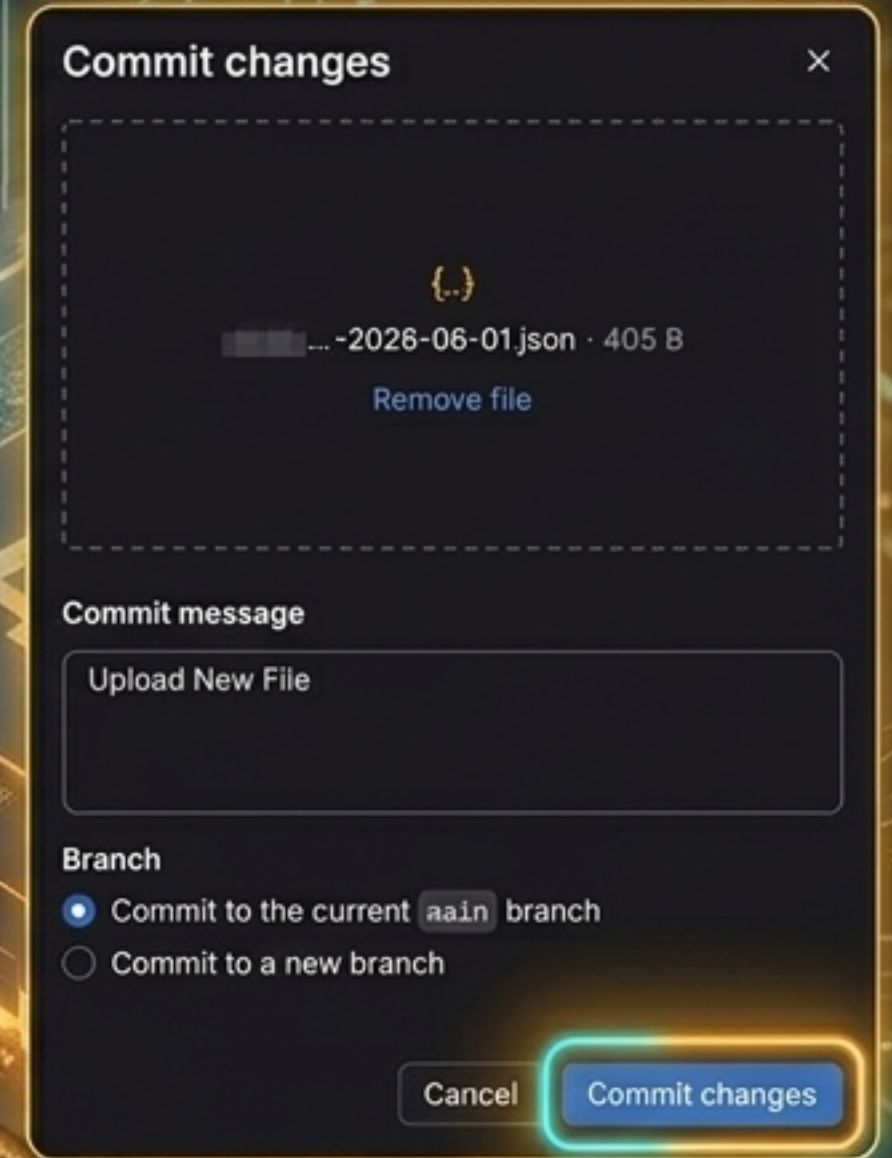

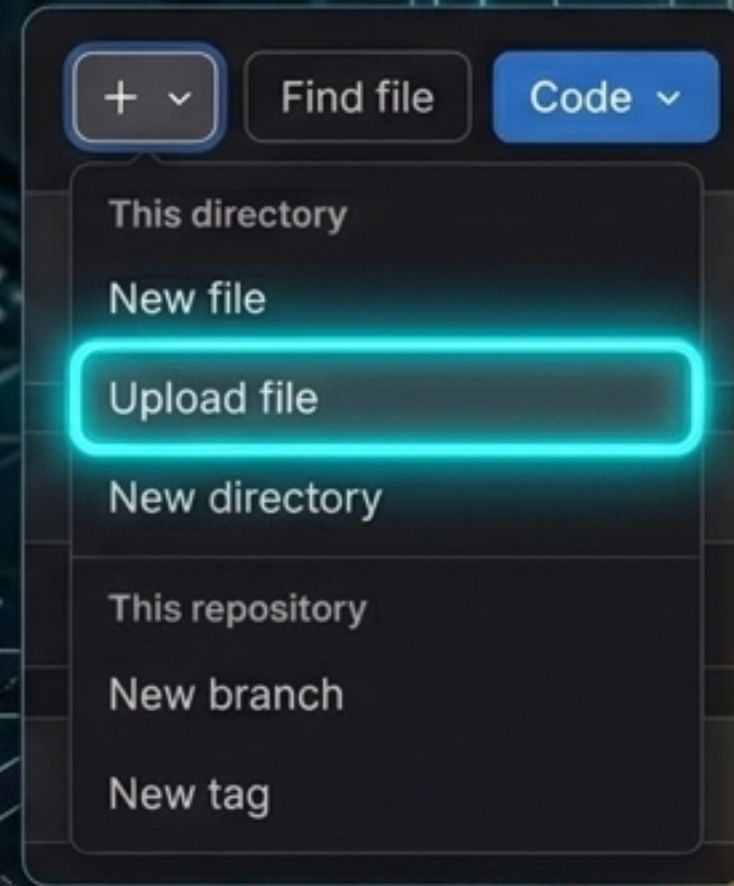

☐ Private

☐ Internal

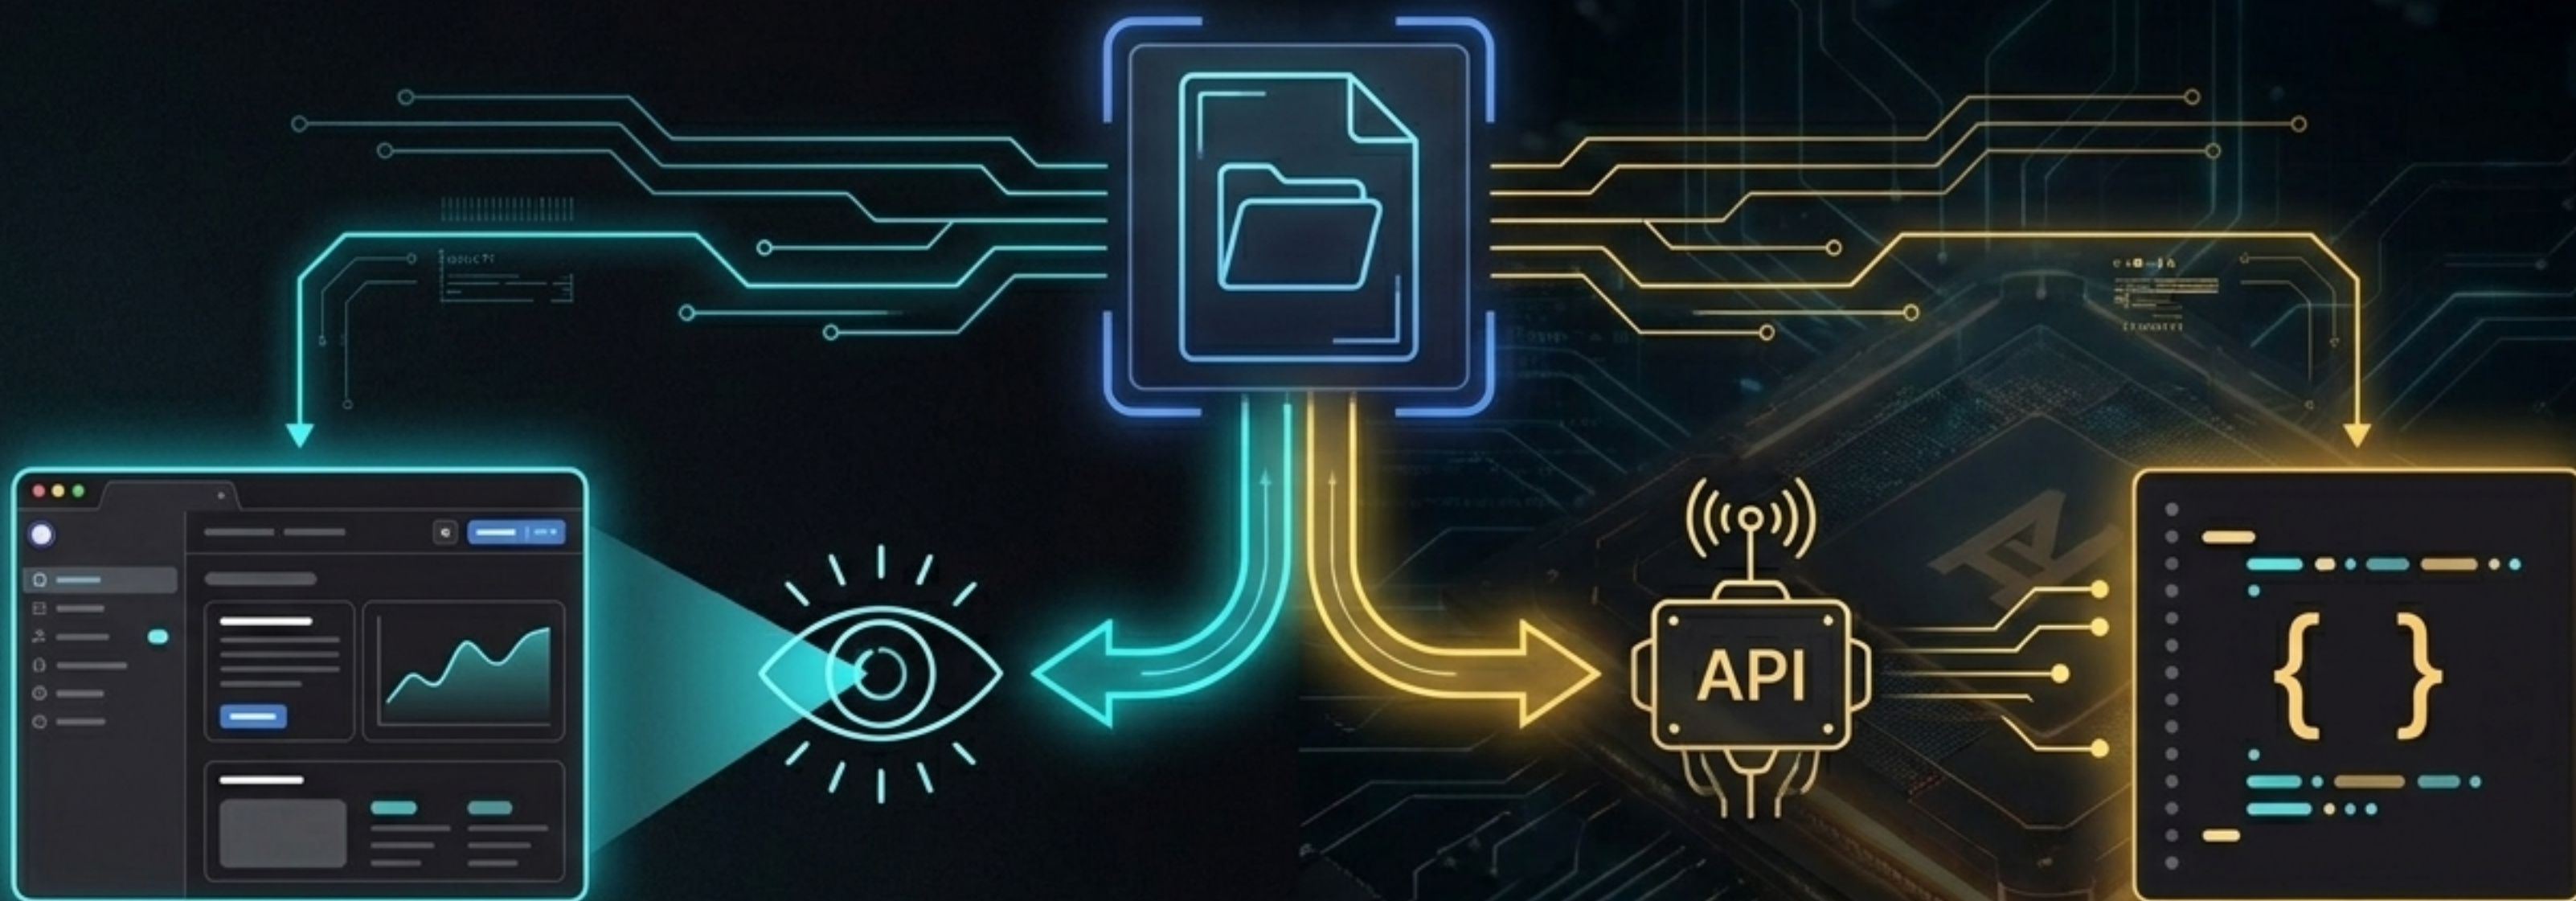

☒ Public

The project can be accessed without any authentication.

In your new project: the **+** button → **Upload file.**
Drop in the JSON file you just exported.
Commit changes.

RAW VS. RENDERED EXPLAINER DIAGRAM

Rendered View:

Built for humans to read on a screen.
Contains menus and styling.

Raw View:

Pure data. Built for global maps
and applications to read instantly.

Open the file in GitLab. Top-right: **Open raw**.
Copy that URL from your browser – that's
your **endpoint**.
